Outcome and Recommendation of the Webinar:

Employability - The rise and fall of opportunity.

Understanding the aspirations and goals of the youth is essential to developing effective employment policies. Aspirations can drive choices in education, employment and job-seeking efforts. During the current covid-19 pandemic, young people faced simultaneous labour market challenges that could lead to modify their aspirations. If changes on aspirations and life goals are not considered, policies aiming to match skills with labor market opportunities may continue to fail. So, it is very necessary to acquaint the youth with the current scenario.

The following were the outcome of the seminar:-

- (1) It helped the youth to understand the scenario of the present employment.

- (2) Students understood about on-line banking, that makes life hassle-free of actual banking.
- (3) To maintain the social distancing was the and simultaneously doing all the activities appropriately.
- (4) Customers behaviour and buying pattern changed significantly, this changed their needs. So, the students became aware about the needs based on market.
- (5) Types of on-line jobs and their scope was understood by the students.
